(1)Not applicable for water-to-water and brine-to-water heat pumps

(*)For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

(**))If Cdh is not determined by measurement then the default degradation coefficient of chillers shall be 0.9.
